Supply Chain Planning & Analytics | Oracle ASCP/MRP | Inventory Optimization | AWS QuickSight

Supply Chain Planning & Operations: Material Requirements Planning (MRP), Supply & Demand Planning, SIOP, Inventory & Safety Stock Optimization, Material Shortage Management, BOM Analysis, Forecast Validation, Procurement Analytics, Supply Scenario Planning, Master Data Governance

Systems & Analytics: Oracle EBS R12, Oracle ASCP/MRP, SQL (Oracle SQL Developer), AWS QuickSight, Amazon S3, AWS Glue, Athena, Power BI, SAP S/4HANA, Advanced Excel (Power Query, Pivot Tables, Macros)

Certification: Microsoft Certified: Power BI Data Analyst Associate (PL-300)

PROFESSIONAL EXPERIENCE

Supply Chain Analyst / Materials Planner | Bloom Energy | Newark, DE (Jun 2025 - Present)

- Safety Stock Optimization: Developed an RLS-enabled AWS QuickSight dashboard using custom Oracle ASCP SQL, providing executives, planners, and buyers regularly refreshed visibility into materials below three-week safety stock thresholds and above-target inventory to support replenishment and inventory optimization.
- Large-Scale Material Planning: Independently managed material planning for a field rework program with a $20M materials budget covering ~20,000 units; coordinated engineering releases, in-house manufacturing, shortages, and global depot replenishment through Oracle-connected Excel supply planning tools.
- Master Data Governance: Established weekly Oracle MRP data quality reviews covering buyer assignments, safety stock, lead times, supplier data, and sourcing rules; reduced flagged exceptions from approximately 800 to 300, validating remaining safety stock exclusions.
- Forecast & Demand Planning: Developed Oracle-based Salesforce-to-MRP checks comparing installation service and kit dates with loaded forecast demand, allowing MRP controllers to correct timing mismatches.
- Supply & Scenario Planning: Architected a self-service revenue and R&O planning tool integrating multilevel BOM explosion, AWS S3, Glue, Athena, and Oracle PO data to forecast date-phased inventory availability, identify shortages, and guide purchasing pull-in/push-out decisions.
- Production Continuity: Managed weekly material shortage reviews for Repair & Overhaul and Site Installation operations, partnering with production control, service, manufacturing, and procurement to resolve supply constraints and reduce recurring material-driven line-down incidents.

Supply Chain Analyst Intern | AAW Trucking Association | Atlanta, GA (Jan 2025 - May 2025)

- Supported supply chain and logistics analytics using SAP S/4HANA and Excel to improve asset tracking, inventory visibility, and route planning, contributing to a 15% reduction in delivery times.
- Developed Power BI dashboards integrating SAP logistics data to monitor supplier performance, shipment status, and route efficiency, replacing fragmented reporting with centralized operational visibility.

Operations Analyst Intern | BrightStar Care | West Chester, PA (May 2024 - Aug 2024)

- Created 3+ SOPs for 50+ frontline staff, leading to a 10% reduction in workplace incidents.
- Analyzed Materials Data and SRM data across 250+ SKUs and 15+ vendors, reducing carrying costs by 30%.

Procurement Analyst | Himtej Stampings | Pune, India (Feb 2022 - Jul 2023)

- Managed $1M+ in annual procurement spend across 20+ suppliers using SAP S/4HANA MM, coordinating sourcing for motor laminations and rotor assemblies and reducing supplier lead times by 30%.

EDUCATION

Pennsylvania State University | Master of Engineering Management (Dec 2024) (GPA 3.80)

Savitribai Phule Pune University | Bachelor of Information Technology (Apr 2021) (GPA 3.60)

PUBLICATIONS

"Optimizing Three-Piece Aerosol Can Production: Efficiency at Sonoco" (Published at IISE)

- Proposed a GRG Nonlinear Solver model to standardize basis weights across aerosol can configurations, projecting a 13.79% reduction in production downtime.
